# Sunrise Platform:

Transport Pack and Yellow Cover enhancements

## About the Update

At NTI, we've long been recognised as the market leader when it comes to our Sunrise platform experience and product offering. But with technology advancing rapidly – and user expectations evolving alongside it – we saw an opportunity to make something great even better.

## Our Enhancements

Every enhancement in our updated Sunrise platform directly responds to **your feedback**. We've listened to what slows you down and what gets in your way, and have focused all improvements around three key benefit areas: **Faster Quoting, Less Manual Work, and More Accuracy & Transparency**.

Each change has been designed to make your day-to-day quoting experience smoother, clearer, and more efficient.

## Benefits for You

### Faster Quoting

- Fewer referrals from dynamic questions and refined driving history restrictions
- Issues can be resolved faster via clear referral explanations in “Our Offer”
- Flexible navigation allows you to move easily forwards and backwards through the quote and make edits without losing progress.

### Less Manual Work

- ANZSIC occupations replace our old list, giving you access to over 450 standardised occupations and allowing existing client occupation data to be used.
- ABN and rego search to help reduce data entry and rekeying
- Auto-populated vehicle details minimises manual lookups
- Option of multiple addresses rather than workarounds like selecting Australia-wide
- Streamlined question sets to keep the quoting process short and simple

### More Accuracy & Transparency

- Item-level premium splits to give you a clearer understanding of pricing\*
- Prefilled data reduces keying errors and inconsistencies
- More precise vehicle details captured automatically via rego lookup

\*Now automatically available on policy documents
