

Dairy tanker components

Quick reference guide

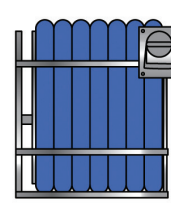

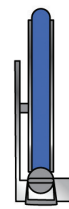

CLEAN IN PLACE (CIP)

The CIP system is an integrated internal cleaning mechanism.

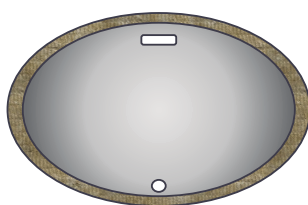

HOSE REELS

Front loaders may feature a reel or sidewinder reel.

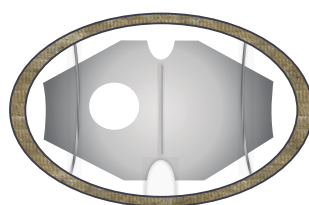

SPILLOVER

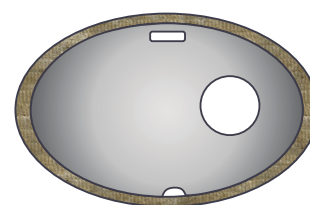

Creates a compartment at the front of the tanker that fills first, keeping milk and weight forwards.

PIN-MOUNTED BAFFLE

Baffles impede the flow of milk within a compartment, reducing surge and improving stability.

FULLY-WELDED BAFFLE

KOMPENSATOR

Allows the units in a combination to roll relative to each other but with the roll axis offset upwards to be closer to the centre of gravity.

BALL RACE

A ball race allows the fifth wheel to rotate, keeping it and its pivots aligned with the trailer.
